STRATEGY DESCRIPTION

The Fund seeks to preserve capital and liquidity while maximizing income. The Fund is primarily invested in money market and short term fixed income securities issued by governments, supranational agencies and corporations.

The Fund invests principally in short-term fixed income securities, such that the duration of the Fund's portfolio is maintained within a range of plus or minus 1 year of the duration of the FTSE Canada Short Term Bond Index or any index which may replace it.

The imaxxFunds are mutual funds offered pursuant to a prospectus. The information contained herein is an overview only and is qualified by the more detailed information contained in the prospectus. The prospectus contains important information about the fund, including its investment objective and strategies, investment risks, purchase options, applicable management fees, performance fees, other charges and expenses. Please read the prospectus carefully before investing. The amount of risk associated with any particular investment depends largely on your own personal circumstances including your time horizon, liquidity needs, portfolio size, income, investment knowledge and attitude toward price fluctuations. Investors should consult their financial advisor before making a decision as to whether this fund is a suitable investment for them. This communication should not be considered a solicitation to buy or an offer to sell securities of the fund. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. The rate of return is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values of the mutual fund or returns on investment in the mutual fund.
