

Dear imaxxFunds investor:

Buoyant start to 2019

Financial markets roared back to life in the first half of 2019, and equity indices fully recovered from the broad and swift sell-off experienced in the fourth quarter of 2018. Led by high growth securities, the S&P/TSX Composite Total Return and the S&P500 Total Return indices recorded gains of 16.22% and 18.54%, respectively. Returns were driven by evidence of recovery supporting the Chinese economy, as monetary and fiscal stimulus measures taken by the Chinese government in 2018 started to bear fruit, reducing the risk of global recession. In addition, the U.S. Federal Reserve's change in monetary policy direction, from raising rates to signaling the potential for interest rate cuts, took the market by surprise, further stimulating financial markets. Fixed income markets responded positively to these signals and to similar indications from other central banks that monetary stimulus will remain in place. Within the Canadian bond market, corporate spreads tightened with the Canadian investment grade index tightening by 0.34%, while the Canadian yield curve shifted lower in a parallel fashion by approximately 0.50%.

Uncertainty ahead

However, risks to global growth remain elevated. Given the potential outcomes of geopolitical events, including a drawn out trade war, and with the possibility of significant impacts on stock markets, the Chief Investment Officer of the imaxx Funds continues to implement a more conservative asset mix in 2019. We believe that quality characteristics and depth of diversification leave the imaxx Funds portfolios well-positioned to participate in potential returns, while managing geopolitical and economic uncertainties.

imaxx Funds being acquired

As announced on May 15, 2019, Fiera Capital Corporation ("Fiera Capital") will acquire all of the outstanding shares of Foresters Asset Management Inc. ("FAM"). FAM is currently manager and portfolio manager of the imaxx Funds. Following the closing of the transaction, Fiera Capital will become the manager and portfolio manager of the imaxx Funds.

Fiera Capital is a global asset management organization with proven expertise and experience across multiple asset classes. We have every confidence that your investments will be in capable hands with Fiera Capital.

Lastly, I'd like to thank you for your continued support.

Sincerely yours,

R. Gregory Ross
President and Chief Executive Officer
Foresters Asset Management Inc.

imaxx Equity Growth Fund

Management discussion of fund performance

Caution regarding forward-looking statements

This report may contain forward-looking statements about the imaxx Equity Growth Fund (the "Fund") including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies, or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors. Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Results of operations

During the six month period ending June 30, 2019, (the "period"), the net asset value of the Fund decreased by \$7.5 million, to \$17.6 million. The Fund had net redemptions of \$10.4 million, which was the principal reason for the decrease in net asset value. The portfolio manager believes that the redemption activity did not have any meaningful impact on the ability of the portfolio manager to implement the Fund's investment strategy. The Fund's performance increased assets by \$2.9 million.

The Fund's Class A units returned 11.07% during the period, while the Fund's benchmark, comprised of 70% S&P/TSX Composite Total Return Index and 30% S&P500 Total Return Index (CAD) (the "Benchmark") returned 15.51%. Unlike the Benchmark, the Fund's return is after the deduction of its fees and expenses. The performance of units of the other classes of the Fund is substantially similar to that of the Class A units, except that performance will vary by class, largely due to the extent that fees and expenses may differ between classes or as a result of varying inception dates. Please see Past Performance for the performance data of the other classes.

Financial markets roared back to life in the first half of 2019, and equity indices fully recovered from the broad and swift sell-off experienced in the fourth quarter of 2018. Led by high growth securities, the S&P/TSX Composite Total Return and the S&P500 Total Return indices recorded gains of 16.22% and 18.54%, respectively in U.S. dollar terms. In Canadian dollar terms, the S&P500 Total Return Index returned 13.71%. Returns were driven by evidence of recovery supporting the Chinese economy, as monetary and fiscal stimulus measures taken by the Chinese government in 2018, started to bear fruit, reducing the risk of global recession. In addition, the U.S. Federal Reserve's change in monetary policy direction, from raising rates to signaling the potential for interest rate cuts, took the market by surprise, further stimulating financial markets and driving valuation levels higher. Likewise, many other central banks around the world have signaled a bias to "easy monetary policy" which has historically been stimulative to stock valuations.

Despite the strong rebound, global uncertainties continue to affect investor sentiment. The ongoing trade disputes -- U.S./China, EU/Europe, Japan/South Korea -- have slowed growth in confidence and business investment. The agreement replacing NAFTA remains unsigned. Increased tariffs and uncertainties are impacting corporate earnings growth. Thus far, the U.S. consumer has remained resilient, aided by a strong labour market and wage growth. However, with no end to the U.S./China trade dispute in sight, the possibility of further escalation of tariffs (particularly on apparel and textiles) and the potential spillover into Vietnam and other countries means the U.S. consumer may be directly hit. Further, the risk remains for a broader global slowdown, with the lack of an immediate solution to Brexit adding additional risk. In Canada, the tone of the Bank of Canada's statements became more accommodative over the period, responding to softer economic data releases, further escalation in political tension with China as a result of the Huawei fallout, and to domestic structural issues, such as peak household debt levels.

Semi-Annual Management Report of Fund Performance as at June 30, 2019

imaxx Equity Growth Fund

Although absolute performance was positive, the Fund underperformed its Benchmark during the period. Positive relative contributions from the Consumer Staples and Consumer Discretionary sectors were outweighed by the negative relative performance of the Information Technology and Energy sectors, the negative impact of the Fund's allocation to cash and equivalents and by the negative impact of the depreciation of the U.S. dollar on the Fund's U.S. currency holdings.

The Fund benefited both from its underweight position and good stock selection in the Consumer Staples sectors. In particular, holdings in Costco and Empire Company benefitted the Fund on both an absolute and relative basis. An overweight position in the Consumer Discretionary sector as well as holdings in Park Lawn, a funeral services / cemetery operator and in Amazon, enhanced the Fund's performance.

The Information Technology and Energy sectors were the largest detractors from relative performance during the period. The Fund's underweight position in the Information Technology sector, versus the Benchmark, detracted from performance. Performance in the Energy sector was impacted by holdings of Pinnacle Renewable, a biofuel provider, and Marathon Petroleum, a crude oil refiner.

The Fund's exposure to U.S. equities decreased slightly during the period, while the Fund's exposure to the U.S. dollar remained stable. The Canadian dollar rose 4.2% against the U.S. dollar during the period, impacting the value of the Fund's U.S. dollar holdings. To mitigate currency driven volatility, the Manager has taken a conservative approach, and executed a Canadian dollar forward contract to maintain the U.S. dollar exposure at approximately 15% of the Fund. The forwards contract enhanced performance during the period.

The portfolio manager continues to formally incorporate the principles of responsible investing, formally incorporating environmental, social and governance (ESG) factors within the investment process, which excludes securities with material exposure to tobacco, weapons, gambling and adult entertainment.

Recent developments

Risks to global growth remain elevated. Given the potential binary outcomes of geopolitical events and the possibility of significant impact on stock markets, the portfolio manager continues to hold a more conservative asset mix in 2019 and believes that the Fund's quality characteristics and depth of diversification leave it well-positioned to participate in potential returns, while managing geopolitical and economic uncertainties in both the long and short term. The Fund continues to be deeply diversified, exploiting opportunities throughout North America.

On August 16, 2019, Fiera Capital Corporation ("Fiera Capital") completed a transaction whereby it acquired all of the issued and outstanding shares of Foresters Asset Management Inc. (renamed Fiera Capital Fund Management Inc.) ("FCFM"). Each member of the independent review committee for the Fund ceased to be a member of the independent review committee upon closing of the transaction ("Closing") and FCFM appointed each of Robert F. Kay, Charles R. Moses and Jerry Patava to act as a member of the independent review committee for the Fund. Shortly following Closing, Fiera Capital will incorporate the FCFM business into its existing Canadian operations, by amalgamating Fiera Capital and FCFM, as well as by effecting certain changes to FCFM's senior officers and directors and portfolio managers during the interim period between Closing and amalgamation. As a result, Fiera Capital will become manager and portfolio manager of the Fund. Unitholder and regulatory approval was obtained for the change of manager of the Fund. In addition, unitholder approval was obtained to amend the trust agreement governing the Fund to grant the manager of the Fund the right to effect a change of auditor without unitholder approval. It is anticipated that the auditor of the Fund will change from Ernst & Young LLP to PricewaterhouseCoopers LLP on or about September 17, 2019.

Related party transactions

Manager and Portfolio Manager

Pursuant to an Amended and Restated Trust Agreement, Foresters Asset Management Inc. (the "Manager") provides or arranges for the provision of all general management and administrative services required by the Fund in its day to day operations, including providing or arranging the provision of investment advice, establishment of brokerage arrangements relating to the purchase and sale of the investment portfolio of the Fund, and bookkeeping, recordkeeping and other administrative services for the Fund. For the period ended June 30, 2019, the management fee totaled \$117,891.

The related policies and procedures of the Manager and the Fund have been approved and are reviewed annually by the Manager's Independent Review Committee.

Pursuant to an Amended and Restated Trust Agreement, the Manager provides investment management services to the Fund. The Manager is an indirect, wholly-owned subsidiary of The Independent Order of Foresters.

Semi-Annual Management Report of Fund Performance as at June 30, 2019

imaxx Equity Growth Fund

Financial highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six-month period ended June 30, 2019 and the past five fiscal years, as applicable.

The Fund's net assets attributable to holders of redeemable units per unit¹

Portfolio turnover rate ⁷	54.81%	103.16%	74.13%	151.64%	143.84%	131.84%
Net asset value per unit	\$19.09	\$17.19	\$19.56	\$18.75	\$18.12	\$19.62

Notes to financial highlights

- (1) This information is derived from the Fund's unaudited interim and audited annual financial statements. For financial years presented prior to 2017, the net assets attributable to holders of redeemable units per unit presented in the financial statements differs from the net asset value per unit calculated for Fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
- (2) Net assets attributable to holders of redeemable units and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of the net asset value per unit.
- (3) Distributions were paid in cash/reinvested in additional units of the Fund, or both.

Ratios and supplemental data

- (4) This information is provided as of the period ended shown.
- (5) The management expense ratio is based on total expenses (excluding commissions and other portfolio costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total of operating expenses (excluding commissions and portfolio transaction costs) and management fees, including applicable taxes, by the average net asset value of the Fund for the financial period, then multiplying the result by 100.
- (6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (7) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Semi-Annual Management Report of Fund Performance as at June 30, 2019

imaxx Equity Growth Fund

Management fees

The Fund incurred management fees of \$117,891 after taxes, year-to-date. The management fee for each class is calculated as a percentage of its net asset value, as of the close of business each day. Each fund class pays a management fee for the provision of fund management services. These services include investment advisory and portfolio management services, costs incurred to manage the funds that are not directly related to a specific fund such as overhead costs and, for some classes of funds, distribution related expenses.

For the six months ended June 30, 2019, the Manager absorbed \$61,515 in operating expenses. The Manager may discontinue absorbing expenses at any time, without notice.

The following table shows the Fund's annual management fee and the maximum trailer fee for each class. The Manager pays trailer fees to dealers out of management fees. The trailer fees are a percentage of the average daily value of units of each imaxxFund held by a dealer's clients. The applicable fee depends on the class of the Fund and the sales charge option selected.

Class A		
Period ended June 30	Management fees (%)	Trailer fees (%)
Initial sales charge option	2.00	1.00
Low load sales charge option	2.00	1.00
Deferred sales charge option	2.00	0.50

Class F		
Period ended June 30	Management fees (%)	Trailer fees (%)
Sales charge	1.00	—

Class I		
Period ended June 30	Management fees (%)	Trailer fees (%)
Sales charge	Negotiable	—

Class O		
Period ended June 30	Management fees (%)	Trailer fees (%)
Sales charge	Negotiable	—

The following table shows the major services paid for out of the management fees as a percentage of the management fee for the classes of the Fund:

Expenses paid out of the Management Fee

Class	Dealer Compensation	Investment Management, Administration and Other
Class A	8%	92%
Class F	—*	100%
Class I	—*	100%
Class O	—*	100%

*No dealer compensation is payable in respect of Class F, Class I and Class O.

Semi-Annual Management Report of Fund Performance as at June 30, 2019

imaxx Equity Growth Fund

Past performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Please remember the Fund's past performance does not indicate how it will perform in the future.

Year-by-year returns (%) (as of June 30, 2019)

The bar charts show the Fund's annual performance for each of the calendar years shown, and illustrates how the Fund's performance has changed from year to year. It shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Class A

Class F

Class I

Class O

*For the six-month period ended June 30, 2019

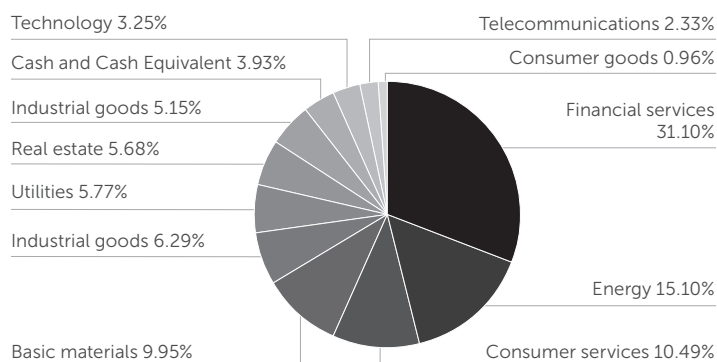

**Returns for 2018 represent a partial year: June 22, 2018 to December 31, 2018 for Class O

In any class where no returns are shown for a year, there were no units outstanding at year end.
